

# Recommended Speed for D10 Turbo Gate Motors

The **D10 Turbo** is capable of moving gates weighing up to 1000kg depending on what speed it has been set to operate at. The table below denotes the maximum operating speed for corresponding gate mass:

**D10 Turbo** maximum operating speed for corresponding gate mass

| Gate mass | Operator maximum running speed |
|-----------|--------------------------------|
| 240kg     | 50m/min                        |
| 300kg     | 42m/min                        |
| 400kg     | 36m/min                        |
| 500kg     | 32m/min                        |
| 600kg     | 29m/min                        |
| 700kg     | 27m/min                        |
| 800kg     | 25m/min                        |
| 900kg     | 24m/min                        |
| 1000kg    | 23m/min                        |
