SECTOR II Traffic barrier.

This document is for use with SECTOR II Traffic Barriers and serves to assist in choosing one of 19 stock hammer-tone colours for Traffic Barriers.

Terms and Conditions:

1. This digital colour selection chart is only to be used as a guide for colour selection; due to the variations in display technology, ambient lighting and other elements beyond our control, we cannot guarantee that the end-result will match the colour selected via an electronic screen. A physical swatch of the colours should be viewed to ensure the correct colour is selected – these are available at all official branches and distributors.
2. 19 stock colours are available, these can be seen in the images below.
3. There is no Minimum Order Quantity for any of the 19 stock colours contained in this document.
4. There is a premium on 16 of the colours; Sun White Ferrotex, Traffic Yellow Ferrotex and Grey Ferrotex (SECTOR II's standard colours) will not attract this premium.
5. Traffic Yellow Ferrotex SECTOR II's are available immediately; SECTOR II's in the other stock colours can take at least 13 working days to prepare.
6. If a non-stock colour is chosen, there may be additional charges and waiting times that apply.
7. The colour's Order Code must be quoted and checked with your Sales Assistant before the Sales Order is placed.
