

**CENTURION**

# **CENTURION ANTI-LIFT BRACKETS**

**Fortify the Gate.**

A BRAND OF **FAAC TECHNOLOGIES**

## CENTURION ANTI-LIFT BRACKETS

**Not Just a Barrier. A Boundary of Power.**

Where control begins and intrusion ends.

**The Weakest Link is the Most Targeted.**

Unanchored sliding gates are more than a vulnerability - they're an open invitation. Criminals exploit this flaw by lifting gates off their tracks to gain swift, silent access.

**CENTURION Anti-lift Brackets** weren't made for ordinary security. They were engineered for those who **refuse to be vulnerable**.

### Technical Specifications

- **Material**  
Mild steel
- **Finish**  
Zinc-plated for corrosion resistance
- **Design**  
Heavy-duty build, designed for mechanical lockout
- **Installation**
  - Requires minimal tools
  - Mounts directly to the gate's top rail and support structure
  - Compatible with most standard sliding gate systems
- **Maintenance**  
None required
- **Weather Resistance**  
Engineered to withstand outdoor conditions without degrading

## For Homeowners

### Secure Your Gate. Block the Breach.

- **Fixed Anti-lift Protection**  
Two interlocking mild steel brackets (Locking Bracket and Holding Bracket) physically block the gate from being lifted off its track.
- **Relentless Steel**  
Made from durable, corrosion-resistant steel
- **Always On Guard**  
Works passively, 24/7. No power or setup required
- **Fits Most Gates**  
Easily integrated into new or existing systems
- **Peace of Mind**  
Reinforce the most vulnerable part of your property

## For Installers

### Fast to Fit. Built to Last.

- **Quick Installation**  
Saves time on site with simple mounting
- **Universal Fit**  
Works across a wide range of installations.  
Each bracket features four position-securing holes, as well as horizontal and vertical adjustment slots, delivering the ultimate in flexibility and versatility in installation
- **Durable Build**  
Zinc plating resists rust and corrosion
- **Professional-Grade**  
Reinforces your installs with visible, physical protection
- **No Call-backs**  
No moving parts. No maintenance. No failures

## Purpose-built Gate Security.

This isn't an optional extra. It's a core security component for any sliding gate system.

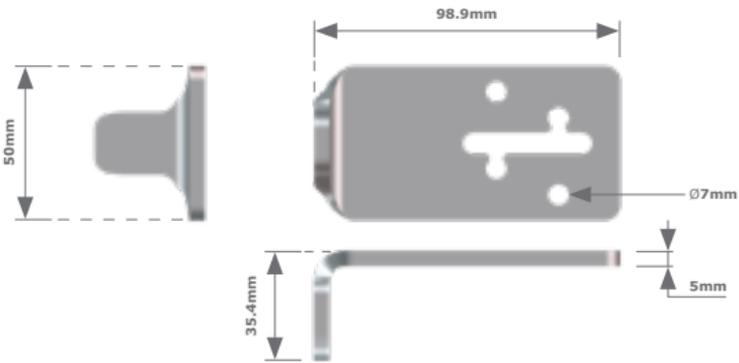

**CENTURION Anti-lift Brackets** help eliminate a known vulnerability, with hardware that performs as hard as your reputation depends on it.

**Ask your installer to fit CENTURION Anti-lift Brackets today.**

Because compromise is not an option.
