METAL GATE STATION

This isn't just any gate station - it's a statement piece built to impress. Crafted from sleek aluminium that's as robust as it is sophisticated, it endures the elements while adding a touch of modern elegance to your property. Forget plastic enclosures - this gate station makes a lasting first impression.

But beauty is more than skin deep. With the **G-SPEAK ULTRA**, convenience and security go hand-in-hand. Answer calls from anywhere using your cellular device, granting access or checking in with visitors remotely. No more being tied to a physical handset. For added peace of mind, the station boasts backlit buttons for clear visibility even at night, ensuring easy operation in any lighting condition.

And for ultimate customisation, the gate station effortlessly integrates with the universal gooseneck (sold separately), providing the perfect finishing touch to your unique entryway style.

Experience the next level of intercom convenience and security, all wrapped in a design that turns heads. Choose the **Metal Gate Station** today.

FEATURES AND BENEFITS

- Answer your intercom from anywhere, using your cellular device - enhanced security and convenience
- No messy and expensive wiring
- One, Two or four call buttons with the ability to add two numbers per button and Time Barring configurable per button (for example; automatically disable primary button at night)
- Backlit button(s)
- Rugged aluminium enclosure
- The mounting holes are compatible with our Universal Gooseneck¹

1. Requires a Gooseneck backing plate to maintain IP rating.

The artfully-designed **Metal Gate Station** is your gateway to security, convenience and peace of mind with a touch of finesse – complementing your entrance with both the freedom and flexibility of mobile communication, as well as eye-catching aesthetics.

MAIN FEATURES

Answer your intercom from anywhere

The **G-SPEAK ULTRA** turns your cellphone into the intercom handset, enabling you to maximise security and convenience with a sense of dual presence and affording you the ultimate in control.

No messy and expensive wiring

Save on labour and material when you go ULTRA. Thanks to the power of mobile communication technology, there's no need to hard-wire the Gate Station to an intercom handset – you'll enjoy crystal-clear two-way wireless communication between the **G-SPEAK ULTRA** and your cellphone.

Customise your experience

Adapt your **G-SPEAK ULTRA** to your lifestyle and preferences with one, two or four call buttons and the ability to add two numbers per button and Time Barring configurable per button (for example; automatically disable primary button at night).

Illuminate your path to convenience

Backlit buttons ensure excellent visibility, even in low-light conditions.

The perfect fit

Effortlessly mount the **Metal Gate Station** at the most comfortable height thanks to seamless compatibility with the CENTURION Universal Gooseneck¹.

TECHNICAL SPECIFICATIONS

Operating temperature	-20°C to +50°C
Humidity	0 - 90% non-condensing
Degree of protection	IP54 ⁴
Dimensions	97mm wide x 40mm deep x 178mm high

1. Requires a **G-SPEAK ULTRA** device, as the Gate Station cannot be used on its own.
2. If the 12V DC gate motor supply dips when the motor starts up and the intercom is being used at the same time, the speech quality might be affected.
3. The Gate Station must only be powered via a **G-SPEAK ULTRA** Device.
4. A Gooseneck backing plate is required when mounting onto a Gooseneck, to maintain IP rating.

Please note that only the one- and two-button models of the Metal Gate Station are compatible with 2G, 3G, and 4G wireless technology.

The four-button Metal Gate Station currently only allows for 4G compatibility.
