- 6 Vector mechano kit packing leaflet

Application

Kit VECMAK00V1 can be used with all VECTOR operators.

This kit has been designed to make the Vector easier to install, and also to give the installer more flexibility during the installation.

The securing plates in this kit are designed to fit either the standard or high security wall brackets. The position of the holes in the securing plate ensures maximum flexibility in selecting the most appropriate mounting point for the operator.

1. Some of the ways that the securing plates can be used are:
